Table DBF12: And, which of the following is most important to you personally that your local health department does in your local community?

Demographic	Help stop the spread of communicable diseases, such as COVID-19, Meningitis, Salmonella, and the flu.	Help stop the spread of communicable diseases, such as Meningitis, Salmonella, and the flu.	Establish prevention programs in the community to address chronic disease and injury, such as diabetes and domestic violence.	Ensure environmental health, such as clean air and clean water.	Work together with the broader healthcare system, such as with local hospitals and community clinics to address problems before they become health crises.	Bring others in government, like police and fire departments and state authorities, together to respond to public health emergencies, such as those resulting from natural and human caused disasters and rebuild afterward.	Reach out to people that are at greatest risk of having poor health outcomes, such as the elderly, disabled, or low-income families, and providing prenatal care and appropriate nutritional assistance to women and children.	Work with partners to help create strong local policies that support and protect people's health, such as smoke-free workplace laws, increasing seatbelt use and encouraging employers to offer paid maternity leave.	Work to improve other local community services such as public education, housing, and employment opportunities	Don't know	Total N
